About

Undergraduate Informatics (Computer Science) student at Universitas Duta Bangsa Surakarta (GPA 3.54 / 4.00) and BNSP-Certified Junior Web Programmer. Experienced in building full-stack web applications and data-driven software solutions using PHP, MySQL, React, and Python. Proven track record through an IT internship at Badan Pusat Statistik (BPS) Surakarta, developing internal workflow automation and data management platforms. Passionate about engineering clean, scalable, and user-friendly digital systems to solve practical operational needs.

Working Experience

- **Badan Pusat Statistik (BPS) Kota Surakarta**

IT Web Developer Intern | Surakarta, Indonesia (August 2025 - December 2025)

1. Designed and developed the *Sistem Manajemen Mahasiswa Magang*, an internal web-based application built to streamline internship administration, attendance verification, and daily logbook reporting.
 2. Architected normalized relational database schemas in MySQL and implemented backend CRUD operations using PHP to ensure high data integrity and efficient record retrieval.
 3. Built responsive user interfaces with structured navigation, reducing manual administrative paperwork and accelerating internal approval workflows.
 4. Partnered with division stakeholders to gather user requirements, troubleshoot bugs, and conduct user acceptance testing (UAT) prior to deployment.
-

Personal Projects

- **SIMA BPS Intern Management System**

Designed and developed a web-based Management Information System (SIMA) during an internship at Statistics Indonesia (BPS) Surakarta City. The system was built to digitize and optimize the structured management of intern data using PHP and MySQL.

- **Sistem Informasi Pelayanan Poli-KIA Berbasis Web**

Designing and developing a web-based Maternal and Child Health (MCH) clinic service information system using PHP and MySQL. The system is designed to manage data on pregnant women, registration, medical examination records, follow-up schedules, and service reports, featuring multi-role access rights for midwives, doctors, and patients.

- **Sistem Informasi Perizinan Keluar-Masuk Karyawan**

Designed and developed a web-based employee entry/exit authorization system for the Surakarta City Statistics Agency (BPS) using PHP and MySQL. The system is designed to record and monitor employee permissions during working hours, featuring request submission, attachment uploads, request history, and multi-role access control for employees and administrators.

Certification

- Pemrogram Web Yuniior (Junior Web Programmer): Badan Nasional Sertifikasi Profesi (BNSP), LSP Telematika (Valid: 2026 – 2029)
 - Linear Algebra: From Pattern Formation to Machine Learning: Khalifa University & Universitas Sebelas Maret (2024)
 - AI for Web Programming: Building Interface with AI: Universitas Duta Bangsa Surakarta (2023)
 - Solo Techno On Ramadhan 2.0: Tech Incubation: Solo Technopark (2026)
-

Education

- **Universitas Duta Bangsa Surakarta (2022 – 2026)**

Bachelor of Computer Science in Informatics 3.54 / 4.00

Skills

- Programming Languages: PHP, JavaScript (ES6+), Python, SQL, HTML5, CSS3
- Frameworks & Libraries: React, Vite, Tailwind CSS, Bootstrap, Node.js (RESTful APIs)
- Databases & Backend: MySQL, Relational Database Architecture, CRUD Operations, Database Normalization
- Data Science & AI: Machine Learning (Naive Bayes, CNN), Text Preprocessing, NLP, Scikit-Learn, TensorFlow/Keras
- Developer Tools & Platforms: Git, GitHub, VS Code, Postman, XAMPP, Vercel
